

## ENERGY POLICY

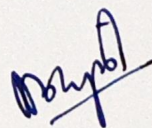

ISWPL reaffirms its commitment to energy conservation and efficiency in all its areas of operations. It is committed to sustainable energy efficiency by minimizing energy consumption, greenhouse gas emission & care for natural resources; promote energy management best practices and promote utilization of renewable energy through: -

- Reduction in consumption of energy.
- Use of renewable energy.
- By procuring energy efficient equipment, products, and services.
- Design for energy performance improvement.
- Providing necessary resources to achieve objectives and targets.

Comply with all applicable legal requirements and other requirements to which organization subscribes related to its energy use, consumption, and efficiency.

Communicate at all levels on enhanced energy performance and involve, our employees and partners for continual improvement in efficient usage of all variables effecting energy consumption.
